No. 27

How Grain is Graded.

The Duties of the different Inspectors throughout the West

Now that the movement of grain is about to commence a description of the method in use for the grading of the same will not come amiss. At the same time a brief reference will be made regarding some of the more salient points as dealt with in the act.

The car of grain upon arrival at a point of inspection is entered by the assistant to the inspector, who immediately takes nine samples from various points of the car. An explanation regarding the method of taking these samples will give an idea as to the thoroughness of the tests. A double brass tube 5 to 6 feet in length by 2 1/2 inches in diameter is used. These tubes work one inside the other and both have a set of apertures in length by 2 1/2 ins. in diameter is cut in length of the cylinders. In order to close the opening it is only necessary to give the under tube a turn until all the holes are closed. The cylinder is then pushed over the grain until the bottom of the car is touched, when the inner tube is again turned until a notch is encountered, which shows that the apertures are all open. Only a second is required in which to allow the cylinder to fill and the inner tube is then turned back thus closing the holes once more. This operation goes on at all points of the car and the grain thus obtained is arranged in rows upon a large square of cotton.

The inspector, when all is ready, size up the samples before him and can immediately tell if there has been any improper handling. Should he find that any one of the samples show a quality of grain inferior to the average of the car, an immediate test of the locality from which this sample was obtained, is made, and if upon further investigation it is shown that there has been improper handling, the car is graded the same

as the poorest grade found therein. This method may seem unfair, but it is the only one that is fair to all parties. The government is very strict in regard to this matter, and endeavor by all possible means to discourage the improper loading of cars. The following clause, numbered 37 in the Act, showing the regulations set down, "No inspecting officer shall in any case make the grade of any lot of grain inspected by him above that of the poorest quality found therein; if he is satisfied that the grain has been improperly loaded for the purpose of deception."

In regard to the working of the elevator, it may be said that the Manitoba Grain Act states that in case of a dispute between the purchaser and seller, a sample of grain shall be taken by both parties, the sample to be average, and three quarts to be taken by each party and put in a suitable sack and sent express prepaid to the chief inspector of grain, whose judgment and finding shall in all matters be conclusive.

The Act only allows 21 hours for the loading of a car, whether it is from wagons or warehouse, and since time is so valuable, it is not surprising that the right of any individual to the car of the flour in this case being a fine one not less than \$25 and not more than \$100 upon summary conviction. The same penalty applies to anyone who outside the meaning of a name on the order book, contrary to the provision of the Act.

There is also a penalty provided for the transferring or selling of the right of any individual to the car of the flour in this case being a fine one not less than \$25 and not more than \$100 upon summary conviction. The same penalty applies to anyone who outside the meaning of a name on the order book, contrary to the provision of the Act.

All good grain that is slightly damp or otherwise unfit for warehousing, shall be entered on the inspecting officer's books as "No grade" which is indication as to quality and condition, and a lot of grain that contains a greenish tinge of other kind of grain will be classed as "No grade."

Grain kept in the grain room until the court sits.

Lapham gave a straight statement of his movements and was allowed to go.

Burglars at Work.

Several Business Places broken into.

On Monday morning last Teskey & Robertson's hardware store, Walls & McDonald's butcher shop, and D. P. Williams' butcher shop were broken into. To the hardware store entrance was obtained by breaking out the glass in the front door so that the Yale lock could be turned on the inside and the door opened. In the case of the two butcher's shops the screen was cut from the front doors and entrance obtained in that way. About \$50 worth of goods were taken from Teskey & Robertson's comprising mostly of pocket knives, silver teaspoons, and minor two revolvers. Mr. Robertson says that they were good judges of pocket knives for they took perhaps a couple of dozen of the very best ones he had, ranging in price from \$2 up to \$5. From the butcher shops it is not known what is taken for neither of the owners knew exactly what they had on hand. The only thing taken would likely be some ham or bacon.

It is quite evident that the burglars were amateurs and expected to get away from the bills but were disappointed in each case. They were likely some of the toughs who have been loitering around town for the last week or two.

On Tuesday afternoon a man, who afterwards gave his name as Frank McJoy, told J. A. Smith the revolver that had been stolen from Teskey & Robertson's store. The police were at once notified and McJoy was soon afterwards placed under arrest. Another man named Robinson, who had been around with McJoy on Monday afternoon and who was thought to have known something about the affair, was also arrested and held as a witness.

The case came up on Wednesday morning in the police court before Inspector Gaudin. McJoy was sent up for trial at the next sitting of the supreme court at Macleod and was taken to Macleod where he will be kept in custody.

Horse Blankets.

We have a very good line of HORSE BLANKETS, 6 1/2 and 7 foot, in Brown and White Duck, Kersey, etc. Drop in and see them.

Also a full line of THRESHER'S SUPPLIES, SHOES, SHIRTS, OVERALLS, etc.

New Steel Range.

It may interest our many readers
who purpose buying a new steel
range in the immediate future to
know there has been placed on the
market a beautiful range named
"Saskatchewan."

This name was chosen from among
20,000 sent in by various contestants,
and of course, is a contraction of the
two provinces "Saskatchewan" and
"Alberta."

The construction of this range in-
dicates that if we wish to find rock-
bottom in any business, we need go
to the manufacturer who has expe-
rience, the capital and the brains.

The McGray Manufacturing Com-
pany, Head Office, London, and
branches in all leading centres, are
the largest manufacturers of stoves
and ranges in the British Empire.
This company is national in its scope
and the name "McGray" has be-
come a byword for honesty and
square dealing.

The Saskatchewan steel range combines
beauty with service, having every
known ordinary feature with such
special and exclusive patented
features as the following:

Automatic lift top and broiler-
holder which makes successful broiling
easy.

Direct draft at front end of stove,
which removes all danger of being
burned by pots, etc.

Double duplicate grates, which can
be removed at the front and which
can be shaken separately, therefore
saving red heat.

Really detachable or detachable
oven, which means that when the
aid of industry any person can
attach a reservoir to their Saskatchewan
range.

A series of advertisements explaining
the extreme features of the range
also in detail, will commence in this
paper forthwith.

Ladies' Aid

Organize at Star Line.

Some of the most wide-awake
ladies in Alberta are living in the
neighborhood of the Star Line school.
Last Tuesday week a number of
them met at the home of Mrs. R. R.
Peck and organized a Ladies' Aid.
Their object is to assist in the in-
terests of church work in the commu-
nity. The officers elected were as
follows: President, Mrs. Peck;
vice-president, Mrs. Olmstead; secre-
tary, Mrs. Williams; treasurer, Mrs.
J. Henderson. The ladies meet on
Thursday afternoon every two weeks.
They are already making plans for a
social evening to raise money to
purchase an organ for church and
Sunday school use which is to be
given Sunday morning next week.
They are the Star Line district will
be welcomed at the fortnightly
meetings.

Big Rush at Land Offices.

All the land offices of Western
Canada were besieged on Tuesday
morning by large numbers of men
wishing to take up homesteads.
At most of the offices people stood
all night in order to be in line in the
morning. It was the greatest rush
for land that ever took place in
Canada. At Lethbridge it is said that
first when the doors of the office
opened in the morning at 9 o'clock
there were between 500 and 1,000
waiting to be admitted. Calgary
had about 200, Edmonton 200, and
 Moose Jaw 200. In most of the
offices it will be several days before
all applications are taken.

Threshers Read This.

Now is the time for you to overhaul your
Thrashing Outfits and get them in perfect order
for the big crop that will soon be ready. We
have made provision for your wants. We have
a large stock of Leather Belting at a much re-
duced price from last year. Also thrashers
Endless Belts. Brass Fittings. Oils of all kinds,
Hay and Harvest Tools. We are always
pleased to show you the goods.

TESKEY & ROBERTSON

Socialist Meeting.

A meeting was held in Brand's
Hall, Stately, last Friday, in the
interests of the socialist party of
Canada and was addressed by Com-
rade E. T. Kingsley of Vancouver.
Comrade Kingsley spoke for over
an hour and a half on the economic
condition and handled the subject in
a most concise and interesting man-
ner. He showed up the state of af-
fairs of present day society and
why it existed and why it would
get some kind of better. He
showed how it was that the farmer,
like the wage worker, was an economic
slave, the only difference being
that the wage worker sold his labor
direct, while the farmer sold his
labor power into wheat, grain, cattle
or other products and then handed
them over to dominant capital. He
showed how fast working class would
be Conservative or Liberal, re-
publicans or Democrats, because
these were the political expression of
the capitalist class and in the work-
ing class were tools of these political
parties unless they joined a
party of their own. If the working
class and farmer is to express itself
politically it must understand the
present system of production and
if he showed that all labor today
was social and the ownership based
on the exploitation of the toiler,
he showed that if they were seri-
ously they should own socially
and thus receive the full benefits of
their production. He also showed
that to retain their families and
working class must prevent in par-
ticular conditions men of their own
class into parliament to legislate in
their favor and bring into being the
only national form of society since
civilization began, viz., the cooperative
commonwealth. After making a
little discussion the meeting closed
and all went away satisfied, express-
ing themselves that they had heard
the best economic lecturer on the
continent. B. C. F.

CARMANGAY.

Most of the wheat is now wet and
shocked and at least one threshing
outlet started in.

Last Tuesday a terrible fire was
started by the trackless train which
also helped to extinguish same.
Neighboring farmers were quickly
on the scene and rendered valuable
assistance in preventing the fire from
having been a serious outbreak, as
there was a very strong wind blowing
at the time.

Mrs. Cook of Toronto, with her
husband, is visiting at the home of
her brother, J. W. Madden.

On Tuesday, August 18th, Mr. and
Mrs. D. Burgess, a son.

Mrs. W. H. Hill is suffering from
a very bad cold, caused by a horse
stepping on it. Blood poisoning
was first suspected and Dr. Wall
was sent for. His tongue is light
and he is fairly on the road to recovery.

Mr. George N. Shinnick's new
house is now nearing completion and
does great credit to the builder, J.
W. Madden.

Several new buildings have been
erected in this vicinity by Mr. J.
V. Galloup.

The services of the Little Bow Inn
have attracted large congregations
during the visit of the Rev. Alvin
and his wife, who were accompanied
by a large number of friends who
have been much appreciated by all
who have been able to attend.
